

**SOUNDCHOICE  
PROAUDIO**

## **Zero-Ohm Systems Appoints Sound Choice Pro Audio as the Exclusive Distributor in Australia and New Zealand**

*Montreal, Canada, September 20, 2020*

We are pleased to make this important announcement extending our growing distribution network to the continent of Oceania. The SCP Audio team will accelerate the dissemination of our core message in the region: Why continue to sacrifice sound quality on major installs? Zero-Ohm Systems provides the simplicity of 70V/100V installations while simultaneously delivering all the benefits of Low-Z. Full range sound + no more transformers = client satisfaction!

*We are thrilled to announce our new partnership with Zero-Ohm Systems, an award-winning technology manufacturer from Canada. SCP Audio is excited to have the opportunity to represent this successful product range here in New Zealand and Australia. These Zero-Ohm devices have a maximum capacity of 2K or 4K watts per channel, therefore, they are ideal for bigger installs such as theme parks, hotels, stadiums, and hospitals. We can't wait to utilize and promote this exceptional technology going forward!*

***Tony Edwards, Director, SCP Audio NZ***
